

Task 8 — Working with VPNs

Author: Anshikaa Pahilajani

Cyber Security Internship — Elevate Labs

Date: 3 October 2025

Objective

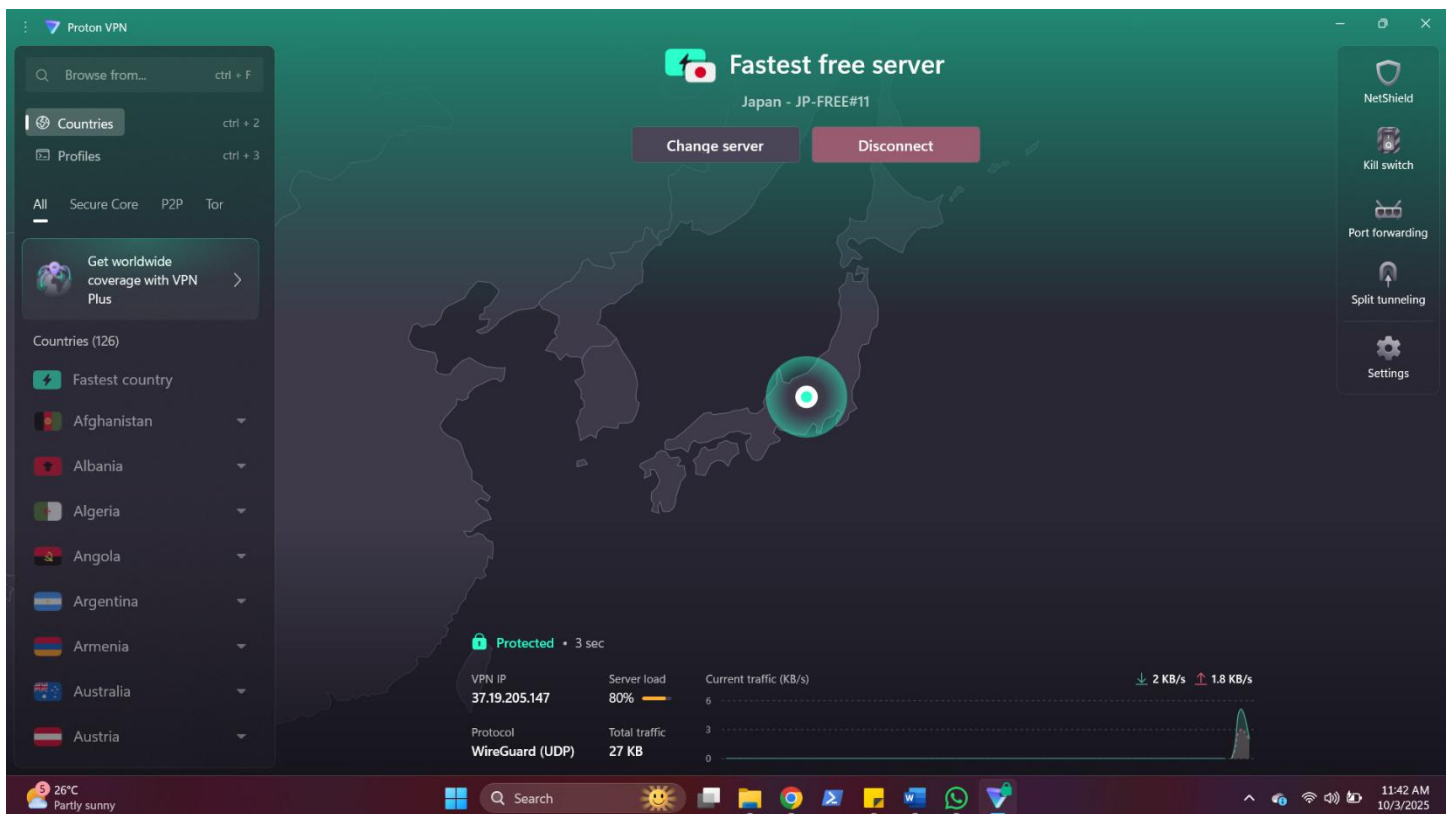

The objective of this task was to gain hands-on experience with a free VPN, understand its role in protecting privacy, encrypting communication, and compare browsing experience with and without a VPN.

Tools Used

- ProtonVPN (Free Tier) client
- Web browser (Chrome)
- Website for IP verification: <https://whatismyipaddress.com>

VPN Setup Steps

1. Created a free ProtonVPN account.
2. Installed ProtonVPN client on my system.
3. Launched the app and connected to a FREE server (server: Japan).

4. Verified that my public IP changed using whatismyipaddress.com.

The screenshot shows the homepage of WhatIsMyIPAddress.com. The header includes the logo, a search bar, and navigation links: ABOUT, PRESS, PODCAST, SUPPORT. Below the header is a menu with links: MY IP, IP LOOKUP, HIDE MY IP, VPNS, TOOLS, and LEARN. The main content area displays the user's IP address as 37.19.205.147 (IPv4) and 'Not detected' (IPv6). It also shows 'My IP Information' including ISP (DataCamp Limited), Services (VPN Server), City (Tokyo), Region (Tokyo), and Country (Japan). A red button labeled 'RATE YOUR VPN' is prominent, along with a link to 'Show Complete IP Details'. A map of Japan is shown on the right, with a location pin near Tokyo. A message states 'Looks like you're using a VPN!'. A link to 'Update My IP Location' is also visible.

My IP Address is:

IPv4: **37.19.205.147**

IPv6: **Not detected**

My IP Information:

ISP: DataCamp Limited

Services: [VPN Server](#)

City: Tokyo

Region: Tokyo

Country: Japan

Looks like you're using a VPN!

5. Browsed HTTPS websites to confirm secure traffic.

The screenshot shows the Wikipedia homepage in a web browser. The address bar displays 'wikipedia.org'. A security overlay on the left indicates 'Connection is secure', 'Cookies and site data', 'Site settings', and 'About this page'. The main content area features the Wikipedia logo and the text 'The Free Encyclopedia'. Below this, a grid of language options is displayed, including English (7,056,000+ articles), 日本語 (1,472,000+ 記事), Deutsch (3,051,000+ Artikel), Español (2,061,000+ artículos), Italiano (1,935,000+ voci), Polski (1,668,000+ hasel), and Português (1,155,000+ artigos). A search bar is located at the bottom of the language grid. The footer includes links to Commons, Wikivoyage, and Wiktionary.

6. Disconnected VPN and verified original IP returned.

Observations

- VPN successfully masked my real IP while connected.
- Browsing worked normally — secure HTTPS sites loaded fine.
- Disconnecting VPN instantly restored my original IP.
- Slight slowdown in browsing observed when VPN was active.

Benefits of VPN

- Encrypts internet traffic, protecting from ISPs and hackers.
- Masks IP, improving privacy.
- Useful on public WiFi for secure connections.
- Can bypass geo-blocks or censorship.

Limitations of VPN

- Slightly slower speeds due to encryption and routing.
- Free VPNs may have limited server options.
- VPN does not guarantee complete anonymity.
- Dependence on trust in VPN provider.
